AUTHOR INDEX

*Starred items are "Shorter Notes"

Alexander, H. *A note on polynomial hulls*, 389.
Appel, K. I. and Schupp, P. E. *The conjugacy problem for the group of any tame alternating knot is solvable*, 329.
Baggs, Ivan. *Conditions implying continuity of open and closed functions*, 185.
Banilower, H. *Projecting $C(S)$ onto $C_0(S)$*, 349.
Barnes, Bruce A. *Pure states with the restriction property*, 491.
Benson, Donald C. *Oscillation of solutions of a generalized Liénard equation*, 101.
Bentley, H. L. *Some Wallman compactifications determined by retracts*, 587.
Berberian, S. K. *Equivalence of projections*, 485.
Bhaskara Rao, K. P. S. and Bhaskara Rao, M. *Mixtures of nonatomic measures*, 507.
Bhaskara Rao, M. See Bhaskara Rao, K. P. S.
Bondy, J. A. *Balanced colourings and the four colour conjecture*, 241.
Boyce, William M. *On polynomials which commute with a given polynomial*, 229.
Brezin, Jonathan. *Applications of nilmanifold theory to diophantine approximations*, 543.
Bridger, Mark. *An ideal criterion for torsion freeness*, 285.
Burke, Dennis K. *Cauchy sequences in semimetric spaces*, 161.
Byrd, K. A. *Rings whose quasi-injective modules are injective*, 235.
Callas, Nicholas P. and Thron, W. J. *Singularities of a class of meromorphic functions*, 445.
Carns, Gail L. and Chao, Chong-Yun. *On the radical of the group algebra of a p-group over a modular field*, 323.
Chao, Chong-Yun. See Carns, Gail L.
Chein, Orin and Robinson, D. A. *An "extra" law for characterizing Moufang loops*, 29.
Chernoff, Paul R. *Perturbations of dissipative operators with relative bound one*, 72.
Clark, W. Edwin. *A coefficient ring for finite noncommutative rings*, 25.
Cobb, John and Voxman, William. *Some fixed point results for UV decompositions of compact metric spaces*, 156.
Dai, Kai K. *On torsion in H-spaces of rank two*, 140.
*DeKleine, H. Arthur. *Unexpected behavior for solutions of a second order, selfadjoint equation*, 210.
Dickman, R. F., Jr. *A necessary and sufficient condition for $\beta X \setminus X$ to be an indecomposable continuum*, 191.
Dixon, Edmond Dale and Wong, Nancy. *A note on K-commutativity of matrices*, 33.
Dressler, Robert E. *A stronger Bertrand's postulate with an application to partitions*, 226.
Eenigenberg, P. J. *Boundary behavior of starlike functions*, 428.
Fefferman, Charles, Jodeit, Max, Jr. and Perlman, Michael D. *A spherical surface measure inequality for convex sets*, 114.
Fischer, J., Karrass, A. and Solitar, D. *On one-relator groups having elements of finite order*, 297.
Garrett, B. D. See Kellum, K. R.
Gehér, L. *Cyclic vectors of a cyclic operator span the space*, 109.
Georgakis, Constantine. *On the arithmetic mean of Fourier-Stieltjes coefficients*, 477.
Gibson, P. M. *A lower bound for the permanent of a (0, 1)-matrix*, 245.
Gleit, Alan and McGuigan, Robert. *A note on polyhedral Banach spaces*, 398.
Goodman, A. W. *Coefficients for the area theorem*, 438.

Gordon, William B. *Convex functions and harmonic maps*, 433.
Gupta, N. D. and Quintana, R. B., Jr. *On groups of exponent four*. III, 15.
Gupta, R. S. *An extremal problem for functions with positive real part*, 455.
Hale, Mark P., Jr. *Normally closed saturated formations*, 337.
Hartman, Phillip A. *Integrally closed and complete ordered quasigroups and loops*, 250.
Hess, Peter. *On the Fredholm alternative for nonlinear functional equations in Banach spaces*, 55.
Holland, Finbarr. *On the coefficients of starlike functions*, 463.
Hoobler, Raymond T. and Magid, Andy R. *Finite group schemes over fields*, 310.
Hsu, Ih-Ching. *On a converse of Young's inequality*, 107.
Jacobson, David. *On perfect subfields over which a field is separably generated*, 292.
Jerome, Joseph W. *Asymptotic estimates of the n-widths in Hilbert space*, 367.
Jodeit, Max, Jr. See Fefferman, Charles.
Jones, Gary D. *A property of* $y''+p(x)y'+\frac{1}{2}p'(x)y=0$, 420.
Kahane, Charles. *Stability of solutions of linear systems with dominant main diagonal*, 69.
Karrass, A. See Fischer, J.
Kartsatos, Athanassios G. *Maintenance of oscillations under the effect of a periodic forcing term*, 377.
Kauffman, Robert M. *Unitary groups and commutators*, 95.
Kelleher, J. J. and Taylor, B. A. *The entire functions separate* βC, 505.
Kellum, K. R. and Garrett, B. D. *Almost continuous real functions*, 181.
Kim, W. J. *On the extremal solutions of nth-order linear differential equations*, 62.
Krikorian, Nishan. *Compact multilinear transformations*, 373.
Kroll, Jeffrey R. and Smith, Keith P. *An eigenvalue problem for the Stieltjes mean sigma-integral related to Gronwall's inequality*, 384.
*Lam, Kee Yuen. *Fiber homotopic trivial bundles over complex projective spaces*, 211.
Landers, Dieter. *The convergence determining class of connected open sets in product spaces*, 529.
Lanski, Charles. *Rings with involution whose symmetric elements are regular*, 264.
Laudal, Olav Arnfinn. *Note on the projective limit on small categories*, 307.
Lazer, A. C. *Application of a lemma on bilinear forms to a problem in nonlinear oscillations*, 89.
Leach, E. B. and Whitfield, J. H. M. *Differentiable functions and rough norms on Banach spaces*, 120.
Lee, Matthew C. Y. *On Weyl's theorem and its converse*, 405.
*Leighton, Walter. *On Liapunov's inequality*, 627.
Lewand, Robert. *Hereditary radicals in Jordan rings*, 302.
McCoy, R. A. *A Baire space extension*, 199.
McGuigan, Robert. See Gleit, Alan.
McMorris, F. R. and Satyanarayana, M. *Categorical semigroups*, 271.
McWaters, M. M. and Reed, J. H. *Retractions and quasi-monotone mappings of unicoherent spaces*, 557.
Magid, Andy R. See Hoobler, Raymond T.
Martinez, Jorge. *Unique factorization in partially ordered sets*, 213.
Miller, Donald W. *A characterization of groups with isomorphic subgroups*, 43.
Mishra, M. N. See Samal, G.
Mitchell, Theodore. *Common fixed-points for equicontinuous semigroups of mappings*, 146.
Murasugi, K. and Thomas, R. S. D. *Isotopic closed nonconjugate braids*, 137.

Myung Mi Myung. *PL involutions of some 3-manifolds*, 576.
Nagasawa, Jun. *Linear isotropy group of an affine symmetric space*, 516.
Nemitz, William C. *Implicative homomorphisms with finite ranges*, 319.
Nunokawa, Mamoru. See Ozaki, Shigeo.
O'Malley, R. J. *Strict essential minima*, 501.
Onose, H. *On oscillations for solutions of nth order differential equations*, 495.
Ossa, Erich. *Unitary bordism of abelian groups*, 568.
Ozaki, Shigeo and Nunokawa, Mamoru. *The Schwarzian derivative and univalent functions*, 392.
Padgett, W. J. and Tsokos, Chris P. *A random Fredholm integral equation*, 534.
Parikh, R. J. *A note on rigid substructures*, 520.
Passman, D. S. *On the ring of quotients of a group ring*, 221.
Peleg, Reuven. *Weak disjointness of transformation groups*, 165.
Perlman, Michael D. See Fefferman, Charles.
Peyser, Gideon. *On spaces with norms of negative and positive order*, 81.
Putcha, Mohan S. and Weissglass, Julian. *Band decompositions of semigroups*, 1.
Quintana, R. B., Jr. See Gupta, N. D.
Reed, J. H. See McWater, M. M.
Richards, Franklin. *On the saturation class for spline functions*, 471.
Robertson, Lewis and Wilcox, Theodore W. *Splitting in MAP groups*, 613.
Robinson, D. A. See Chein, Orin.
Roitberg, Joseph. *On a construction of Bredon*, 623.
Rossa, R. F. *More properties inherited by the lower radical*, 247.
Samal, G. and Mishra, M. N. *On the lower bound of the number of real roots of a random algebraic equation with infinite variance*, 523.
Satyanarayana, M. See McMorris, F. R.
Schafer, James A. *The signature of fiber bundles*, 548.
Scheffer, Wladimiro. *Maps between topological groups that are homotopic to homomorphisms*, 562.
Scholz, U. Kurt. *On averaging Lefschetz numbers*, 607.
Schultz, Martin H. *Quadrature-Galerkin approximations to solutions of elliptic differential equations*, 511.
Schupp, P. E. See Appel, K. I.
Shilepsky, Carol. *A note on the asymptotic behavior of an integral equation*, 111.
Shult, Ernest, *The graph extension theorem*, 278.
Sinclair, A. M. *Annihilator ideals in the cohomology of Banach algebras*, 361.
Smart, John Roderick. *On meromorphic functions commuting with elements of a function group*, 343.
Smith, Keith P. See Kroll, Jeffrey R.
Snow, Donald R. *Gronwall's inequality for systems of partial differential equations in two independent variables*, 46.
Solitar, D. See Fischer, J.
Stevens, Robert R. *A conjugacy criterion*, 75.
Stone, H. E. *Ideals in halfrings*, 8.
Stong, R. E. *A dual to the bordism concept*, 554.
*Strait, Peggy Tang. *A note on Lévy's Brownian process on the Hilbert sphere*, 207.
Stralka, A. R. *The lattice of ideals of a compact semilattice*, 175.
Strong, Paul L. *Quotient and pseudo-open images of separable metric spaces*, 582.
Subbarao, M. V. and Suryanarayana, D. *On an identity of Eckford Cohen*, 20.
Suryanarayana, D. See Subbarao, M. V.

Tall, Franklin D. *A set-theoretic proposition implying the metrizability of normal Moore spaces*, 195.
Tan, Kok-Keong. *Common fixed point theorems for almost weakly periodic nonexpansive mappings*, 355.
Taylor, B. A. See Kelleher, J. J.
Thomas, Emery. *Cohomology operations on p-fold sums*, 551.
Thomas, R. S. D. See Murasugi, K.
Thornton, M. C. *Spaces with given homeomorphism groups*, 127.
Thron, W. J. See Callas, Nicholas P.
Treybig, L. B. *Shelling 3-cells in compact triangulated 3-manifolds*, 171.
Tsokos, Chris P. See Padgett, W. J.
Tucker, Lloyd D. *Embedding partially ordered spaces in topological semilattices*, 203.
Turner, T. Rolf. *Double commutants of algebraic operators*, 415.
Van Osdol, D. H. *Coalgebras, sheaves, and cohomology*, 257.
Venzke, Paul. *On $\mathfrak{F}$-abnormal maximal subgroups of a finite solvable group*, 316.
Vidossich, Giovanni. *On compactness in function spaces*, 594.
Vought, Eldon J. *Strongly semi-aposyndetic continua are hereditarily locally connected*, 619.
Voxman, William. See Cobb, John.
Waggoner, Roger. *A fixed point theorem for $(n-2)$-connected n-polyhedra*, 143.
Wall, Charles R. *Bi-unitary perfect numbers*, 39.
Warner, Seth. *Normability of certain topological rings*, 423.
Warren, Nancy M. *Properties of Stone-Čech compactifications of discrete spaces*, 599.
Weissglass, Julian. See Putcha, Mohan S.
West, James E. *Hereditary ball-covers for some Banach manifolds*, 132.
Whitfield, J. H. M. See Leach, E. B.
Whitley, W. T. *Homotopy types of the deleted product of unions of two simplexes*, 151.
Wilcox, Theodore W. See Robertson, Lewis.
Wiley, Samuel J. *Extensions of left uniformly continuous functions on a topological semigroup*, 572.
Wong, Edward T. *Regural rings and integral extension of a regular ring*, 313.
Wong, Nancy. See Dixon, Edmond Dale.
Zame, William R. *Homomorphisms of rings of germs of analytic functions*, 410.
Zedek, Mishael. *On the Lebedev-Milin inequality*, 395.

INDEX TO VOLUME 33

SUBJECT INDEX

*Starred items are "Shorter Notes"

A. Algebra and Number Theory

05. Combinatorics

Bondy, J. A. *Balanced colourings and the four colour conjecture*, 241.

06. Order, Lattices, Ordered Algebraic Structures

Hartman, Phillip A. *Integrally closed and complete ordered quasigroups and loops*, 250.

Martinez, Jorge. *Unique factorization in partially ordered sets*, 213.

Nemitz, William C. *Implicative homomorphisms with finite ranges*, 319.

Stralka, A. R. *The lattice of ideals of a compact semilattice*, 175.

10. Number Theory

Dressler, Robert E. *A stronger Bertrand's postulate with an application to partitions*, 226.

Subbarao, M. V. and Suryanarayana, D. *On an identity of Eckford Cohen*, 20.

Wall, Charles R. *Bi-unitary perfect numbers*, 39.

12. Algebraic Number Theory, Field Theory and Polynomials

Boyce, William M. *On polynomials which commute with a given polynomial*, 229.

Dixon, Edmond Dale and Wong, Nancy. *A note on K-commutativity of matrices*, 33.

Jacobson, David. *On perfect subfields over which a field is separably generated*, 292.

13. Commutative Rings and Algebras

Bridger, Mark. *An ideal criterion for torsion freeness*, 285.

Rossa, R. F. *More properties inherited by the lower radical*, 247.

14. Algebraic Geometry

Hoobler, Raymond T. and Magid, Andy R. *Finite group schemes over fields*, 310.

15. Linear and Multilinear Algebra; Matrix Theory (finite and infinite)

Gibson, P. M. *A lower bound for the permanent of a* (0, 1)*-matrix*, 245.

Lazer, A. C. *Application of a lemma on bilinear forms to a problem in nonlinear oscillations*, 89.

16. Associative Rings and Algebras

Byrd, K. A. *Rings whose quasi-injective modules are injective*, 235.

Carns, Gail L. and Chao, Chong-Yun. *On the radical of the group algebra of a p-group over a modular field*, 323.

Clark, W. Edwin. *A coefficient ring for finite noncommutative rings*, 25.

Lanski, Charles. *Rings with involution whose symmetric elements are regular*, 264.

Passman, D. S. *On the ring of quotients of a group ring*, 221.

Rossa, R. F. *More properties inherited by the lower radical*, 247.

Stone, H. E. *Ideals in halfrings*, 8.

Warner, Seth. *Normability of certain topological rings*, 423.

Wong, Edward T. *Regular rings and integral extension of a regular ring*, 313.

17. Nonassociative Rings and Algebras

Lewand, Robert. *Hereditary radicals in Jordan rings*, 302.

18. Category Theory, Homological Algebra

Laudal, Olav Arnfinn. *Note on the projective limit on small categories*, 307.

Sinclair, A. M. *Annihilator ideals in the cohomology of Banach algebras*, 361.
Van Osdol, D. H. *Coalgebras, sheaves, and cohomology*, 257.

20. Group Theory and Generalizations

Appel, K. I. and Schupp, P. E. *The conjugacy problem for the group of any tame alternating knot is solvable*, 329.
Chein, Orin and Robinson, D. A. *An "extra" law for characterizing Moufang loops*, 29.
Fischer, J., Karrass, A. and Solitar, D. *On one-relator groups having elements of finite order*, 297.
Gupta, N. D. and Quintana, R. B., Jr. *On groups of exponent four*. III, 15.
Hale, Mark P., Jr. *Normally closed saturated formations*, 337.
McMorris, F. R. and Satyanarayana, M. *Categorical semigroups*, 271.
Miller, Donald W. *A characterization of groups with isomorphic subgroups*, 43.
Putcha, Mohan S. and Weissglass, Julian. *Band decompositions of semigroups*, 1.
Shult, Ernest. *The graph extension theorem*, 278.
Venzke, Paul. *On $\mathfrak{F}$-abnormal maximal subgroups of a finite solvable group*, 316,

B. Analysis

26. Real Functions

Hsu, Ih-Ching. *On a converse of Young's inequality*, 107.
Kellum, K. R. and Garrett, B. D. *Almost continuous real functions*, 181.
Kroll, Jeffrey R. and Smith, Keith P. *An eigenvalue problem for the Stieltjes mean sigma-integral related to Gronwall's inequality*, 384.

28. Measure and Integration

Bhaskara Rao, K. P. S. and Bhaskara Rao, M. *Mixtures of nonatomic measures*, 507.
O'Malley, R. J. *Strict essential minima*, 501.

30. Functions of a Complex Variable

Boyce, William M. *On polynomials which commute with a given polynomial*, 229.
Callas, Nicholas P. and Thron, W. J. *Singularities of a class of meromorphic functions*, 445.
Eenigenburg, P. J. *Boundary behavior of starlike functions*, 428.
Goodman, A. W. *Coefficients for the area theorem*, 438.
Gupta, R. S. *An extremal problem for functions with positive real part*, 455.
Holland, Finbarr. *On the coefficients of starlike functions*, 463.
Kelleher, J. J. and Taylor, B. A. *The entire functions separate βC*, 505.
Ozaki, Shigeo and Nunokawa, Mamoru. *The Schwarzian derivative and univalent functions*, 392.
Smart, John Roderick. *On meromorphic functions commuting with elements of a function group*, 343.
Zedek, Mishael. *On the Lebedev-Milin inequality*, 395.

32. Several Complex Variables and Analytic Spaces

Alexander, H. *A note on polynomial hulls*, 389.
Zame, William R. *Homomorphisms of rings of germs of analytic functions*, 410.

34. Ordinary Differential Equations

Benson, Donald C. *Oscillation of solutions of a generalized Liénard equation*, 101.
*DeKleine, H. Arthur. *Unexpected behavior for solutions of a second order, selfadjoint equation*, 210.
Jones, Gary D. *A property of $y''+p(x)y'+\frac{1}{2}p'(x)y=0$*, 420.

Kahane, Charles. *Stability of solutions of linear systems with dominant main diagonal*, 69.
Kartsatos, Athanassios G. *Maintenance of oscillations under the effect of a periodic forcing term*, 377.
Kim, W. J. *On the extremal solutions of nth-order linear differential equations*, 62.
Lazer, A. C. *Application of a lemma on bilinear forms to a problem in nonlinear oscillations*, 89.
*Leighton, Walter. *On Liapunov's inequality*, 627.
Onose, H. *On oscillations for solutions of nth order differential equations*, 495.
Stevens, Robert R. *A conjugacy criterion*, 75.

35. Partial Differential Equations
Snow, Donald R. *Gronwall's inequality for systems of partial differential equations in two independent variables*, 46.

40. Sequences, Series, Summability
Callas, Nicholas P. and Thron, W. J. *Singularities of a class of meromorphic functions*, 445.

41. Approximations and Expansions
Jerome, Joseph W. *Asymptotic estimates of the n-widths in Hilbert space*, 367.
Richards, Franklin. *On the saturation class for spline functions*, 471.

42. Fourier Analysis
Georgakis, Constantine. *On the arithmetic mean of Fourier-Stieltjes coefficients*, 477.

45. Integral Equations
Kroll, Jeffrey R. and Smith, Keith P. *An eigenvalue problem for the Stieltjes mean sigma-integral related to Gronwall's inequality*, 384.
Shilepsky, Carol. *A note on the asymptotic behavior of an integral equation*, 111.

46. Functional Analysis
Banilower, H. *Projecting $C(S)$ onto $C_0(S)$*, 349.
Barnes, Bruce A. *Pure states with the restriction property*, 491.
Berberian, S. K. *Equivalence of projections*, 485.
Gleit, Alan and McGuigan, Robert. *A note on polyhedral Banach spaces*, 398.
Krikorian, Nishan. *Compact multilinear transformations*, 373.
Leach, E. B. and Whitfield, J. H. M. *Differentiable functions and rough norms on Banach spaces*, 120.
Peyser, Gideon. *On spaces with norms of negative and positive order*, 81.
Sinclair, A. M. *Annihilator ideals in the cohomology of Banach algebras*, 361.
Tan, Kok-Keong. *Common fixed point theorems for almost weakly periodic nonexpansive mappings*, 355.
Turner, T. Rolf. *Double commutants of algebraic operators*, 415.
Warner, Seth. *Normability of certain topological rings*, 423.
Zame, William R. *Homomorphisms of rings of germs of analytic functions*, 410.

47. Operator Theory
Chernoff, Paul R. *Perturbations of dissipative operators with relative bound one*, 72.
Gehér, L. *Cyclic vectors of a cyclic operator span the space*, 109.
Hess, Peter. *On the Fredholm alternative for nonlinear functional equations in Banach spaces*, 55.
Kauffman, Robert M. *Unitary groups and commutators*, 95.
Lee, Matthew C. Y. *On Weyl's theorem and its converse*, 405.
Tan, Kok-Keong. *Common fixed point theorems for almost weakly periodic nonexpansive mappings*, 355.
Turner, T. Rolf. *Double commutants of algebraic operators*, 415.

49. Calculus of Variations and Optimal Control
Gordon, William B. *Convex functions and harmonic maps*, 433.

C. APPLIED MATHEMATICS

65. Numerical Analysis
Schultz, Martin H. *Quadrature-Galerkin approximations to solutions of elliptic differential equations*, 511.

D. GEOMETRY

52. Convex Sets and Geometric Inequalities
Fefferman, Charles, Jodeit, Max, Jr. and Perlman, Michael D. *A spherical surface measure inequality for convex sets*, 114.
53. Differential Geometry
Nagasawa, Jun. *Linear isotropy group of an affine symmetric space*, 516.

E. LOGIC AND FOUNDATIONS

02. Logic and Foundations
Parikh, R. J. *A note on rigid substructures*, 520.
Tall, Franklin D. *A set-theoretic proposition implying the metrizability of normal Moore spaces*, 195.

F. STATISTICS AND PROBABILITY

60. Probability Theory and Stochastic Processes
Landers, Dieter. *The convergence determining class of connected open sets in product spaces*, 529.
Padgett, W. J. and Tsokos, Chris P. *A random Fredholm integral equation*, 534.
Samal, G. and Mishra, M. N. *On the lower bound of the number of real roots of a random algebraic equation with infinite variance*, 523.
*Strait, Peggy Tang. *A note on Lévy's Brownian process on the Hilbert sphere*, 207.

G. TOPOLOGY

22. Topological Groups, Lie Groups
Brezin, Jonathan. *Applications of nilmanifold theory to diophantine approximations*, 543.
Robertson, Lewis and Wilcox, Theodore W. *Splitting in MAP groups*, 613.
Scheffer, Wladimiro, *Maps between topological groups that are homotopic to homomorphisms*, 562.
Stralka, A. R. *The lattice of ideals of a compact semilattice*, 175.
Wiley, Samuel J. *Extensions of left uniformly continuous functions on a topological semigroup*, 572.
54. General Topology
Baggs, Ivan. *Conditions implying continuity of open and closed functions*, 185.
Banilower, H. *Projecting $C(S)$ onto $C_0(S)$*, 349.
Bentley, H. L. *Some Wallman compactifications determined by retracts*, 587.
Burke, Dennis K. *Cauchy sequences in semimetric spaces*, 161.

Cobb, John and Voxman, William. *Some fixed point results for UV decompositions of compact metric spaces*, 156.
Dickman, R. F., Jr. *A necessary and sufficient condition for $\beta X \setminus X$ to be an indecomposable continuum*, 191.
Kellum, K. R. and Garrett, B. D. *Almost continuous real functions*, 181.
McCoy, R. A. *A Baire space extension*, 199.
McWaters, M. M. and Reed, J. H. *Retractions and quasi-monotone mappings of unicoherent spaces*, 557.
Mitchell, Theodore. *Common fixed-points for equicontinuous semigroups of mappings*, 146.
